

## Combination lock 1844

Patented functions according  
DE 50 2010 004 511.2

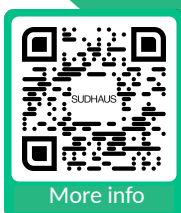

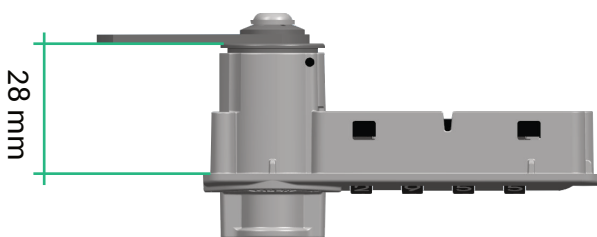

Our combination lock 1844 is robust and freely adjustable. With high functionality and user-friendly design.

The high-quality and equally elegant zinc die-cast housing can be custom coloured and electroplated.

Freely selectable number combination with automatic blurring mechanism as well as simple code change by the operator without further aids characterise the combination lock 1844.

### Installation depth

single - user

Zinc - die casting  
Housing

Example of use: A user in office management is assigned a locker, can freely select the numerical code and change it individually at any time. In addition, a service lock cylinder has been installed which is used for emergency opening and automatic code finding.
