

## Combination lock 1843

Patented functions according  
DE 50 2010 004 511.2

The SUDHAUS combination lock 1843 is a new variant of the patented lock 1844.

The lock includes all the functions of the lock 1844.

Example of use: A user in the sports area is assigned a locker, can freely select the numerical code and change it individually at any time. In addition, a service lock cylinder has been installed which is used for emergency opening and automatic code identification.

single - user

Plastic Housing

The material of the housing is plastic and allows a variety of colour designs.

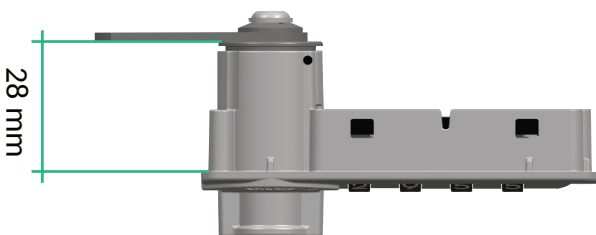

**Standard colour black or white.**  
**Special colours on request.**
