

Combination lock 1153 CCV

Patented functions according
DE 50 2010 004 511.2

The lock 1153 is a simple yet sophisticated **single-user** lock.

It has a mechanical **automatic blurring function** which is executed every time the door is opened and closed. The master key is used for emergency opening.

The code is found manually via an opening aid.

The 1153 is available in various installation positions.

Example of use: A user, e.g. in office management, is assigned a locker and can freely select the numerical code and change it individually at any time.
